ANDRZEJ LIKOŃSKI | Senior Software Engineer

SUMMARY

I am an senior software engineer with more than four years of experience. I also find myself as a fan of Java, maths enthusiast, interested in almost every aspect of tech. I am open for new opportunities to develop my skills not only as software developer but also as a team worker, future architect and mentor. I always pay attention to the details because for me being precise is as important as being effective.

EDUCATION

WROCŁAW UNIVERSITY OF SCIENCE AND TECHNOLOGY
Engineering degree in Computer Science
Faculty of Electronics

10/2014 - 02/2019
Wrocław

STUDENTS ORGANIZATION - SISK
Member
Organization of university events such as hackathons (eg. Jelly Pizza Hack). I took a part in various team projects and additional courses.

05/2016 - 02/2019
Wrocław

EXPERIENCE

INDEPENDENT CONTRACTOR
Self Employed

08/2022 - Present
Warsaw

PRODUCT ENGINEERING SPECIALIST
Accenture
During last three years I gained a lot of knowledge and proved myself in terms of various cloud solutions. I integrated multiple micro-services with REST/SOAP API and message brokers such as Azure Eventhub, Kafka, Solace etc. Besides enhancing my coding skills in Spring and Java I consulted with a clients, designed from scratch and documented a lot of features. I designed and developed a few automation pipelines mostly with Docker, Powershell and Azure Devops tools. In breaks between projects and sometimes as an overtime I had an opportunity to be a team lead in some prove of concept initiatives. Occasionally as a subject matter I worked on offers and cost estimations for business clients. I am a leader of tech meetup that encourage developers to extend their knowledge and a mentor to some interns.

04/2019 - 08/2022
Warsaw

JAVA DEVELOPER
Janmedia Interactive
Designing and implementing features for e-commerce based on specification. Creating software tests and documentation. Taking a part in daily scrum. Refactoring of legacy code.

06/2018 - 04/2019
Wrocław

DEVELOPER
Pronos
Supporting data mining system using Bash and Java. Preparation of IT infrastructure and technical documentation. Design and automation of regression tests.

03/2018 - 06/2018
Wrocław

TRAINEE
Reconizer
During internship within an assistance of senior coworkers I implemented few features for Android app and created a documentation of them. I also learned about Firebase (NoSQL database by Google).

07/2017 - 08/2017
Wrocław

Skills

CORE SKILLS	Java | Spring | Message Brokers | Cloud Architecture | Azure
FRAMEWORKS & TOOLS	Git | Maven | Docker | SQL | Bash | Powershell
LANGUAGES	**Native:** Polish | **Fluent:** English | **Beginner:** Italian

Honors & awards

AWARD IN A GOVERNMENT HACKATHON - HACK THE CRISIS
03.2020

Team member

I was a member of a Helpful Neighbour app team on GovTech hackathon organized because of the COVID-19 crisis.

Interests

In my spare time, besides following news about technology and artificial intelligence I love computer games. I have participated in several e-sport events with my friends. I am also a huge fan of old school cars, rock music of the seventies, DIY things and assembling IKEA furniture.
